 - Material-ui
 - Framer.js
 - Firebase
 - Razor pay Payment Gateway
 - InstaMojo Payment Gateway
 - Twilio

Muhammed Shafeeque P

Sr Software Engineer

Profile

As a seasoned Mean/MERN Stack Developer, I offer a rich blend of knowledge and technical prowess that sets me apart. With a solid track record of 2 years in crafting cutting-edge web applications, I bring a wealth of expertise encompassing both front-end and back-end development. Additionally, my proficiency extends to seamless deployment on diverse cloud platforms.

Work Experience

- Jan 2023- Present
Rawdata Technologies , Cochin
Sr Software Engineer
InTEution ERP Solution for the Shipping Industry
 - Implemented URP (User Role Permission) in the InTEution Project on the Front-End side.
 - Initiated the Data Visualization process within the InTEution system.
 - Developed a software solution, the "InTEution Sales App," designed to integrate seamlessly with InTEution as an associate application.
 - Managed a dedicated 4-member team throughout the development of the Sales App's Front-End.
 - Utilized Angular 14 for Front-End development
 - Successfully delivered the Sales App within a remarkable time
- May 2022 - Jan 2023
Rawdata Technologies , Cochin
Software Engineer
 - Developed a module called CMNR (Container Maintenance and Repair) for the InTEution project using Angular.
 - Completed the CMNR module in just 2 months, surpassing the company's initial estimate of 6 months.
 - Led a team during the development of the BC29 program, which served as a Welcome display board for the new Accenture office in Bangalore. This project utilized MERN stack technology.
 - BC29 presented significant challenges and exciting opportunities for me.
 - Gained practical experience in DevOps during the BC29 project.
 - Enhanced problem-solving skills through involvement in the BCD9 program.
- March 2021 - Jan 2022
Reizen Hub, Malappuram
Co-Founder & CTO
 - Developed a comprehensive project to bring the innovative concept of Reizen Hub to life
 - Designed and structured the entire project, ensuring its successful execution.
 - Implemented crucial technologies like Razorpay and Twilio using Node.js to enhance the project's functionality and features

🔧 EXPERTISE

- Database & ORM
 - MongoDB
 - Mongoose
 - TypeOrm
- Tools
 - Git
 - Vs Code
 - Jira
- Cloud Platforms
 - DigitalOcean
 - AWS
- Cloud Repositories
 - GitHub
 - Bit Bucket

Personal Projects

PMH Accounts – Accounting Application for Supermarkets

MAY 2023 – ONGOING

- **Technologies:** MERN Stack (MongoDB, Express.js, React, Node.js), React Bootstrap, React Form Hooks
- **Description**
 - Designed for supermarkets, PMH Accounts include features like Profit and Loss (P&L) reporting, billing, and stock management.
 - Utilized MERN stack and modern front-end technologies to streamline supermarket operations and enhance financial management.
- **Repository:** <https://github.com/muhammedshafeeqe/pmh-billing.git>

ARD MINUTES – Application for VI Distribution Agency

JUL 2023 – AUG 2023

- **Technologies:** MERN Stack (MongoDB, Express.js, React, Node.js), React Bootstrap, React Form Hooks, Progressive Web App (PWA)
- **Description:**
 - Custom-built accounting application designed specifically for VI distribution agencies.
 - Advanced features include Profit and Loss (P&L) reporting for financial analysis.
 - Utilizes progressive web app capabilities to enhance user experience and accessibility.
- **Live:** <https://ard.muhammedshafeeqe.online/>
- **Repository:** <https://github.com/muhammedshafeeqe/ard-communication>

Crapee Talks – Real-Time Chatting Application

Feb 2022 to Mar 2022

- **Description:** Crapee Talks is a real-time chatting application developed using the MERN stack along with Socket.io for seamless real-time communication.
- **Features:**
 - Authentication for secure user access
 - Real-time one-on-one chat functionality.
 - Group chat support for collaborative conversations.
- **Technologies Used:**
 - Backend: Node.js, Express.js, MongoDB, Mongoose, Socket.io
 - Frontend: React.js, Chakra-UI
- **Repository:** <https://github.com/muhammedshafeeqe/crapee-talks>

OLX Clone

Jul 2021 to Aug 2021

- **Description:** An OLX clone project replicating key features of the popular online marketplace.
- **Features:**
 - Add product.
 - Purchasing functionality
 - Listing and browsing products
 - User authentication for secure access.
- **Technologies Used:**
 - Backend: Firebase
 - Frontend: React.js, CSS
- **GitHub Repository:** https://github.com/muhammedshafeeqe/olx_clone
- **Demo:** <https://snazzy-rugelach-270749.netlify.app>

Result Publisher

Jun 2021 to Jun 2021

- **Description:** An application developed for a youth club to facilitate the online publication of quiz results.
- **Technologies Used:**
 - Backend: Node.js, MongoDB, Express Handlebars
 - Frontend: HTML, CSS, Bootstrap
- **GitHub Repository:** https://github.com/muhammedshafeeqe/quiz_result
